The Joint Secretary to
Health, Education and Local
Administration Department,
Government of Madras,
MADRAS.

No.5365 W2/55-1/39-18 dated 23--3--1955.

Sir,

Sub:- Legislative Assembly question No.3151 (starred) -
Mangalore Water Supply Scheme

Ref:- Memorandum No.20381 H.5/55-1 Health dated 10-3-1955
from Health, Education and Local Adminstration Department.

The particulars called for in your memorandum cited are furnished below:-

1. The investegation of the water supply scheme for Mangalore with Gurpur river as source was completed in 1946, but the source was later given up as unsatisfactory. In G.O.Ms.No.32 H dated 3-1-1952, the Government directed the collection of full particulars for the preparation of detailed plans and estimates for the revised water supply scheme for Mangalore Municipality with Netravati river as source. The preparation of plans and estimates and collection of field particulars were simultaneously taken up and completed during May 1952.

p.t.o.

2. The Mangalore Water Supply Scheme with Netravati river as source is expected to be completed by the end of 1957.

S. R. Srinivasan

Note for supplementaries.

The investigation of the water supply scheme for Mangalore Municipality with Gurpur river as source was completed in 1946. In G.O.Ms.No.1798,P.H.,dated 16-5-49, the Govt.sanctioned the plans and estimates amounting to Rs.3.15 lakhs for the work of infiltration gallery and suction well forming the first stage of the scheme with Gurupur river as source and ordered its execution. Subsequently on account of the poor yield and the defective quality of the water. the execution of the scheme was deferred. The Chief Engineer then proposed a revised scheme for Water Supply for the Municipality with Nethravathi river as source. In G.O.32, Health, dated 3-1-52, the C.E.was asked to collect full particulars for the preparation of detailed plans and estimates for a revised water supply scheme with Nethravathi river as source. The preparation of plans and estimates and collection of field particulars for the revised scheme were simultaneously taken up and completed during May,1952. In April,1953, the Govt. accorded their administrative approval to an approximate estimate of Rs.82.85 lakhs for the revised scheme. The cost of the scheme was at first proposed to be met as follows:

Municipal resources	Rs.4.11 lakhs
Govt.grant	Rs.53.24 "
" loan	Rs.25.50 "

The Govt.sanctioned the disbursement of a loan of Rs.8 lakhs in 1952-53. Subsequently, the Govt. expressed their inability to grant any loan and advised the Municipality to raise the necessary loan for ~~execution of~~ the scheme from its residents. The Municipal Council then proposed to raise a loan of Rs.17.5 lakhs in the open market and the Govt. guaranteed the repayment of the loan to be raised

by the Municipal Council. To avoid the loss of any working season in the execution of the scheme, the Govt.sanctioned a temporary advance upto the limit of Rs.12 lakhs during 1954-55 pending the raising of the loan by the Municipal Council. Afterwards, the Municipal Council raised the necessary loan in the open market.

In March, 1954, the Sanitary Engineer reported that the adoption of the rate of 15 gallons per capita in the place of 20 gallons per capita would yield a saving in the capital cost of the scheme to the tune of Rs.14.30 lakhs in the original estimate of the scheme. The Govt. approved the proposal of the Sanitary Engineer to adopt the rate of 15 gallons and informed the Municipal Council that it would be given a grant of Rs.38.94 lakhs only as against the originally fixed amount of Rs.53.24 lakhs towards the cost of the scheme. During 1954-55 the Govt.sanctioned the disbursement of a loan of Rs.6,41,600 to the Municipal Council.

The C.E.recently reported that the revised estimate of Rs.88.23 lakhs on the basis of 15 gallons per capita was not based on current P.W.D.schedule of rates but was based on the data given in the estimate sanctioned in 1949 for the scheme with Gurpur river as source. The Govt.thereupon accorded administrative approval to the revised estimate of Rs.88.23 lakhs submitted by the C.E. for all the four stages of the scheme on a 15 gallon basis, the method of financing the scheme being left to be determined later.

This is one of the schemes approved by the Govt. of India for central loan assistance during 1954-55 and 1955-56. The scheme is under execution and is expected to be completed by the end of 1957.

NOTE FOR SUPPLEMENTARIES

....

The investigation of the water supply scheme for Mangalore Municipality with Gurpur river as source was completed in 1946. In G.O.Ms. No. 1798 Public Health, dated 16-5-49, the Government sanctioned the plans and estimates amounting to Rs. 3.15 lakhs for the work of infiltration gallery and suction well forming the first stage of the scheme with Gurpur river as source and ordered its execution. Subsequently on account of the poor yield and the defective quality of the water, the execution of the scheme was deferred. The Chief Engineer then proposed a revised scheme for Water Supply for the Municipality with Nethravathi river as source. In G.O.No. 32, Health, dated 3-1-52, the Chief Engineer was asked to collect full particulars for the preparation of detailed plans and estimates for ~~the~~ a revised water supply scheme with Nethravathi river as source. The preparation of plans and estimates and collection of field particulars for the revised scheme were simultaneously taken up and completed during May, 1952. In April, 1953, the Government accorded their administrative approval to an approximate estimate of Rs. 82.85 lakhs for the revised scheme. The cost of the scheme was at first proposed to be met as follows:

Municipal resources	Rs. 4.11 lakhs
Govt. grant	Rs. 53.24 "
" loan	Rs. 25.50 "

The Government sanctioned the disbursement of a loan of Rs. 8 lakhs in 1952-53. Subsequently, the Government expressed their inability to grant any loan and advised the Municipality to raise the necessary loan for the scheme from its residents.

The Municipal Council then proposed to raise a loan of of Rs. 17.5 lakhs in the open market and the Government guaranteed the repayment of the loan to be raised by the Municipal Council. To avoid the loss of any working season in the execution of the scheme, the Government sanctioned a temporary advance upto the limit of Rs. 12 lakhs during 1954-55 pending the raising of the loan by the Municipal Council. Afterwards, the Municipal Council raised the necessary loan in the open market.

In March, 1954, the Sanitary Engineer reported that the adoption of the rate of 15 ½ gallons per capita in the place of 20 gallons per capita would yield a saving in the capital cost of the scheme to the tun of Rs. 14.30 lakhs in the original estimate of the scheme. The Government approved the proposal of the Sanitary Engineer to adopt the rate of 15 gallons and informed the Municipal Council that it would be given a grant of Rs. 38.94 lakhs only as against the originally fixed amount of Rs. 53.24 lakhs towards the cost of the scheme. During 1954-55 the Govern ent sanctioned the disbursement of a loan of Rs. 6,41,600 to the Municipal Council.

The Chief Engineer recently reported that the revised estimate of Rs. 68.55 lakhs on the basis of 15 gallons per capita was not based on current public Works Department schedule of rates but was based on the data given in the estimate sanctioned in 1949 for the scheme with Gurpur river as source. The Government thereupon accorded administrative approval to the revised estimate of Rs. 88.23 lakhs submitted by the Chief Engineer for all the four stages of the scheme on a 15 gallon basis, the method

method of financing the scheme being left to be determined later.

This is one of the schemes approved by the Government of India for central loan assistance during 1954-55 and 1955-56. The scheme is under execution and is expected to be completed by the end of 1957.
